Specification and imagery are indicative and should only be used as a guide. Vehicle and accessory specification, features, colour and trim may differ at the time of vehicle delivery.

A woman with curly hair, wearing a shimmering, sequined, sleeveless dress, is captured mid-air, jumping over a low, rectangular coffee table. She is smiling and has her arms raised. The setting is a modern, high-rise apartment with large floor-to-ceiling windows. Outside, the city lights are visible at night. The interior features contemporary furniture, including a brown armchair with a fur throw and a dark sofa. The overall atmosphere is sophisticated and celebratory.

# OH WHAT A FEELING

You'll feel it with every drive. In every twist and every turn. It's our unwavering commitment to move you, not only today, but well into tomorrow as we relentlessly reimagine the future of mobility.

With our eyes on the horizon, we're committed to creating a future where all of humankind is empowered with the freedom to move.

# Go boldly into the future

Now completely redesigned throughout, Yaris advances the everyday capabilities of compact mobility. As exciting to drive as it is to admire, Yaris is just as adept at turning heads as it is darting about city streets.

The bold styling is based upon the progressive Toyota New Global Architecture (TNGA) platform to help ensure greater body rigidity as well as eye-catching individuality. You can further personalise Yaris ZR with high-contrast two-tone colour combinations. More than good looking,

every Yaris is also packed with the latest technology and advanced safety features.

Plus, in a significant step for a vehicle of this size, you can choose to power your Yaris SX or ZR with the efficiency of the next generation Toyota Hybrid System.

# Shaped to impress

One look and you know Yaris is ready for action. Its free flowing shape and flared fenders promote greater airflow efficiency as well as making a bold statement in style. The compact shape, low centre of gravity and assured roadholding help ensure easier handling and help deliver a truly enjoyable driving experience.

Up front, the distinctive T-shape grille and aggressively styled LED headlamps, or Halogen headlamps on Ascent Sport, work together to create a fearless expression. The three dimensional styling of the integrated rear window and LED tail lamps are the epitome of contemporary design and help ensure Yaris always stands out from the crowd.

# Born to perform

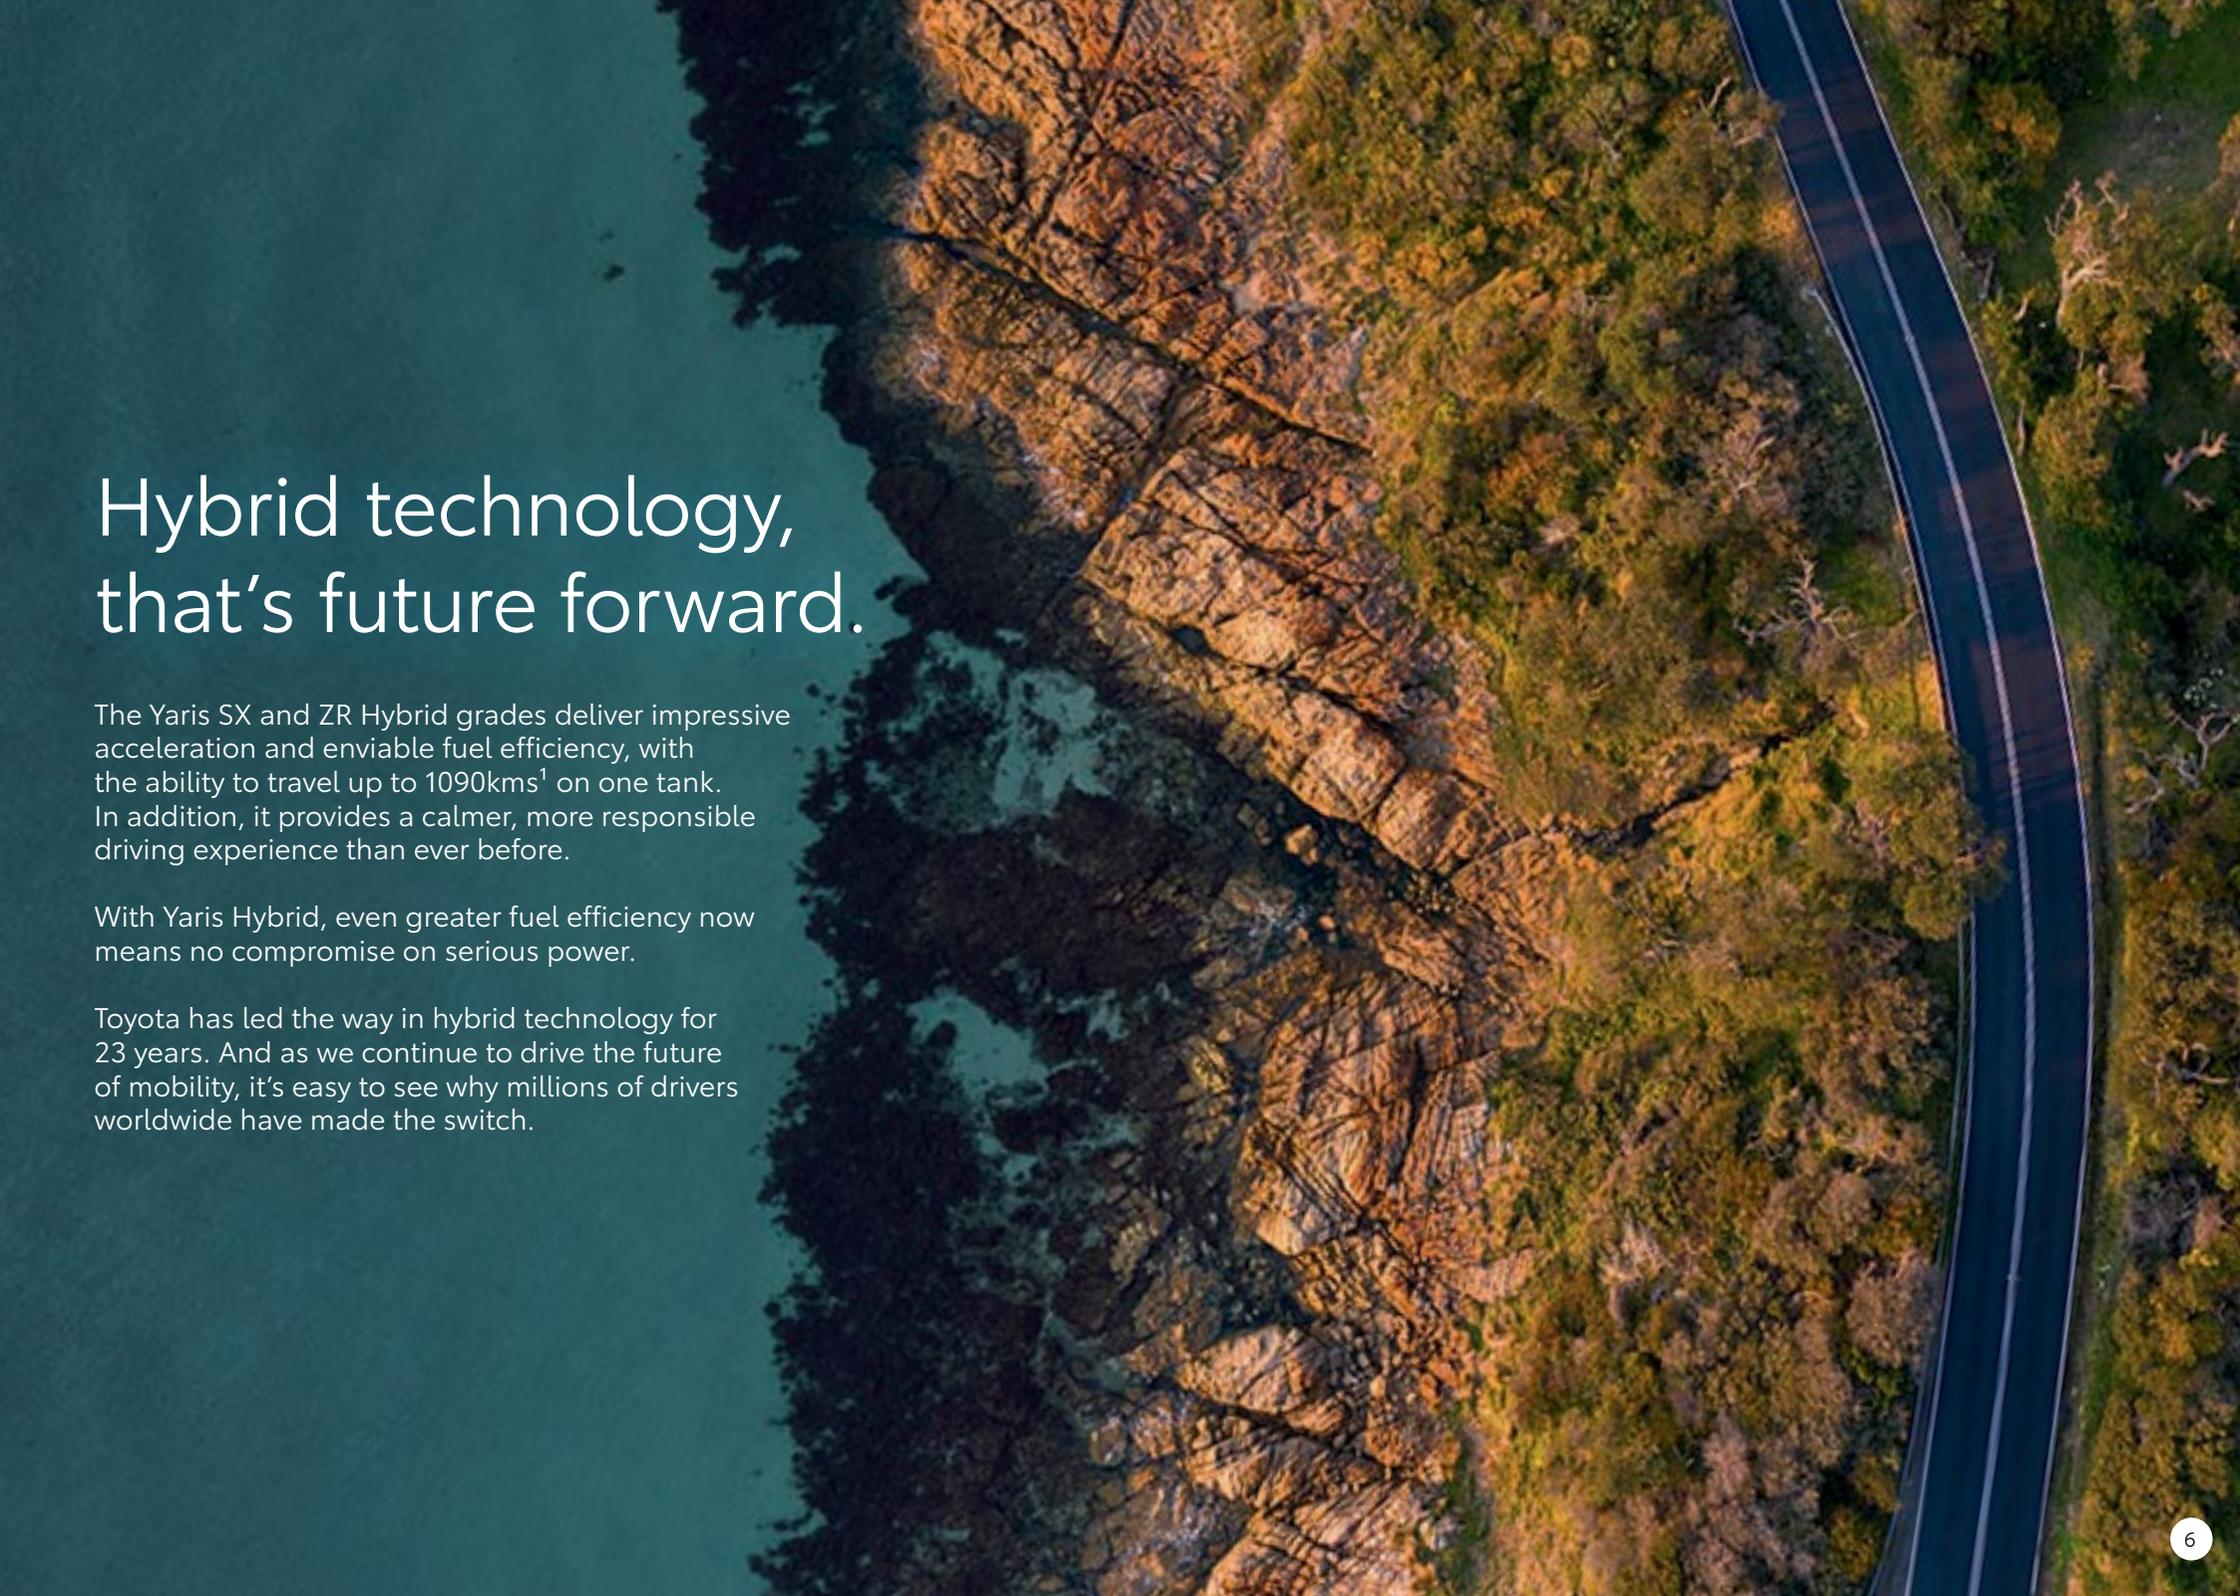

Yaris packs some serious punch for its size. Its bold exterior is complemented by equally impressive engine performance to help provide a spirited yet environmentally conscious drive.

The 1.5 litre 3 cylinder VVT-i petrol engine (model pictured) is built smaller and lighter, featuring the latest technology to achieve outstanding fuel efficiency. It also produces an impressive 88kW of power and 145Nm of torque to deliver a lively driving experience.

In a first for its class, Yaris SX and ZR grades are also available with the next generation Toyota Hybrid System that offers exceptional fuel efficiency and a choice of hybrid driving modes based on driving conditions. Electric Vehicle mode for quiet running, ECO for everyday driving with enhanced fuel efficiency and POWER to enjoy a more responsive drive.

The petrol and hybrid engines are linked to a Continuously Variable Transmission (Auto CVT) that helps produce outstanding response as well as enhanced acceleration and fuel efficiency.

An aerial photograph showing a dark asphalt road that curves through a dense forest. The trees are in various shades of green and yellow, suggesting an autumn setting. To the left of the road, a calm body of water reflects the sky. The overall scene is serene and natural.

# Hybrid technology, that's future forward.

The Yaris SX and ZR Hybrid grades deliver impressive acceleration and enviable fuel efficiency, with the ability to travel up to 1090kms<sup>1</sup> on one tank. In addition, it provides a calmer, more responsible driving experience than ever before.

With Yaris Hybrid, even greater fuel efficiency now means no compromise on serious power.

Toyota has led the way in hybrid technology for 23 years. And as we continue to drive the future of mobility, it's easy to see why millions of drivers worldwide have made the switch.

# The Hybrid System

## Four Key Benefits

Toyota Hybrid's latest technology gets you moving powerfully and smoothly every time. Enjoy an uncompromising drive with responsive, dynamic performance.

## Quiet

The quieter and calmer experience in a Toyota Hybrid is proven to deliver one of the most satisfying and enjoyable drives on the road, with no compromise on vehicle responsiveness. It's why millions of hybrid drivers choose never to go back to petrol-only engines once they've made the switch.

## Reliable

Toyota's Hybrid System offers the reliability and quality you can always expect from Toyota. Tested and trusted for 23 years – so no matter where you go, you'll have peace of mind in every drive.

## Powerful

Experience an uncompromising drive in a Toyota Hybrid with responsive, dynamic performance. You get impressive off-the-line torque that gets you moving powerfully and smoothly every time.

## Starting off

The electric motor is used primarily. Power stored in the battery is used to turn the motor.

## Full acceleration

Power is provided by the petrol engine in addition to the electric motor. Output is maximised for acceleration.

## Braking and deceleration

The electric motor functions as a generator to recharge the battery by itself. No fuel is used, so there are minimal CO<sub>2</sub> emissions.

## Normal driving

A mix of petrol and electric is used for best economy, depending on the conditions. The battery is recharged where possible.

## At rest

With the car brought to a stop, the petrol engine cuts off. The system automatically avoids idling to conserve fuel and reduce CO<sub>2</sub> emissions.

# Smart space to move

The dynamic Yaris interior features a gently arcing dashboard that flows effortlessly from side to side. Metallic ornamentation (SX only) and sophisticated soft touch finishes create an instantly welcoming atmosphere to help bring the joy of driving to life.

All functional controls and the unique door handles are deliberately shaped to provide the ultimate in ergonomic practicality. Purposely clutter-free, everything is designed to create a more spacious and contemporary space, including increased room between the front seats

and deeper, more accommodating legroom. Convenient storage spaces including device, cup and water bottle holders are placed within easy reach, while the flexible two-tier luggage space can quickly be increased by folding down the 60:40 split rear seat.

# Connect with your world

The technology in Yaris leads the way with advanced connectivity and intuitive innovations.

The 7" touchscreen display features Apple CarPlay<sup>®2</sup> and Android Auto<sup>™,3</sup> that allow you to experience seamless connectivity including access to Siri<sup>®2</sup> Eyes Free and Google Now<sup>™,3</sup> voice commands with compatible smartphones. It also includes the latest Toyota AM/FM/Digital Radio<sup>4</sup> (DAB+) as well as other handy features including Bluetooth<sup>®5</sup> connectivity, enhanced voice recognition, reversing camera and the myToyota<sup>6</sup> app to connect with your smartphone for live weather updates, travel and traffic information and more. Plus you'll find a convenient USB<sup>6</sup> port and 12V DC power supply in the central panel.

On Yaris SX and ZR models, satellite navigation<sup>7</sup> with SUNA<sup>™,8</sup> traffic channel will help guide you smoothly to your destination.

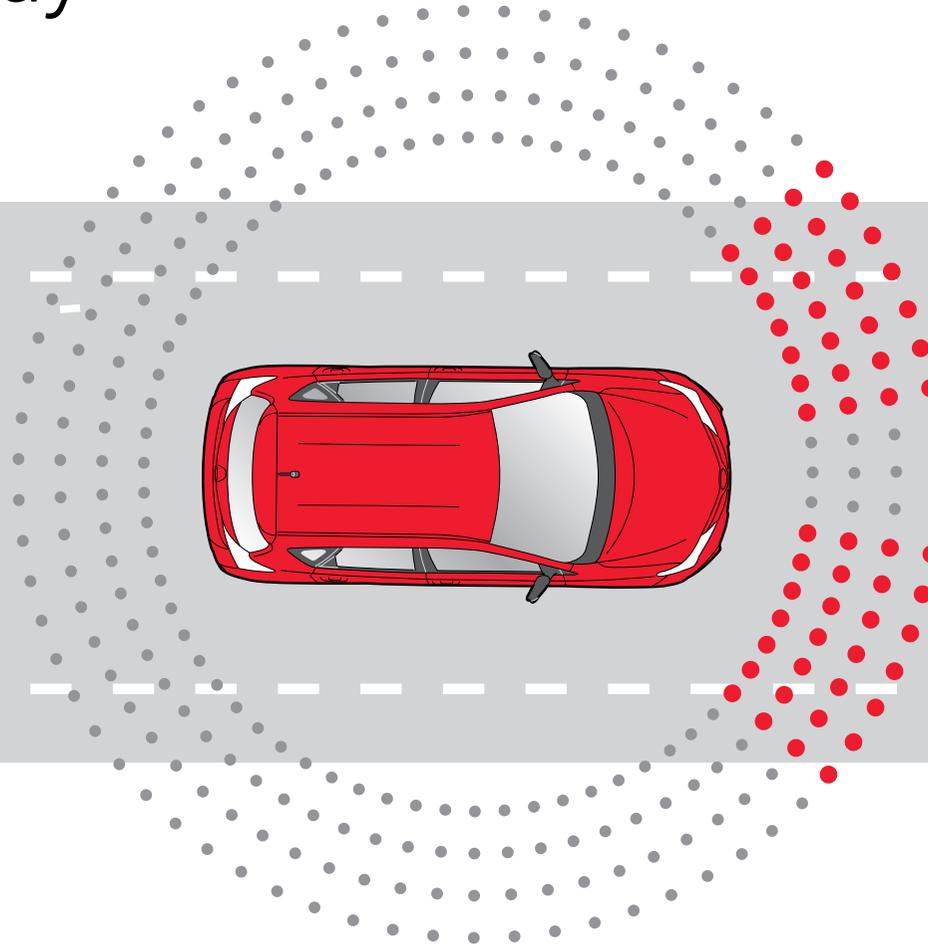

The 4.2" TFT Multi Information Display (MID) provides key driving information right where you need it. SX and ZR models are fitted with dual digital meters and on Yaris ZR these are complemented with a Head-Up Display (HUD).

On the open road, Dynamic Radar Cruise Control<sup>9</sup> (DRCC) uses sensors to maintain a constant distance from the vehicle in front.

# Leading the way in safety

The sheer enjoyment of driving a Yaris comes with the added confidence of knowing you're surrounded by advanced safety features and technology to help keep you safe, today and into the future.

Apart from an impact absorbing body structure to help disperse impact away from the driver and passengers, there are eight SRS airbags to help protect you. The Anti-lock Braking System (ABS) helps prevent wheel lock-up and skipping, while Vehicle Stability Control (VSC) helps counteract oversteer or understeer when cornering. Traction Control (TRC)

automatically controls engine output or applies the brakes to any wheel that's skidding on slippery surfaces or where there's variable grip. Emergency Brake Signal (EBS) alerts trailing vehicles if you're forced to make a sudden stop.<sup>9</sup>

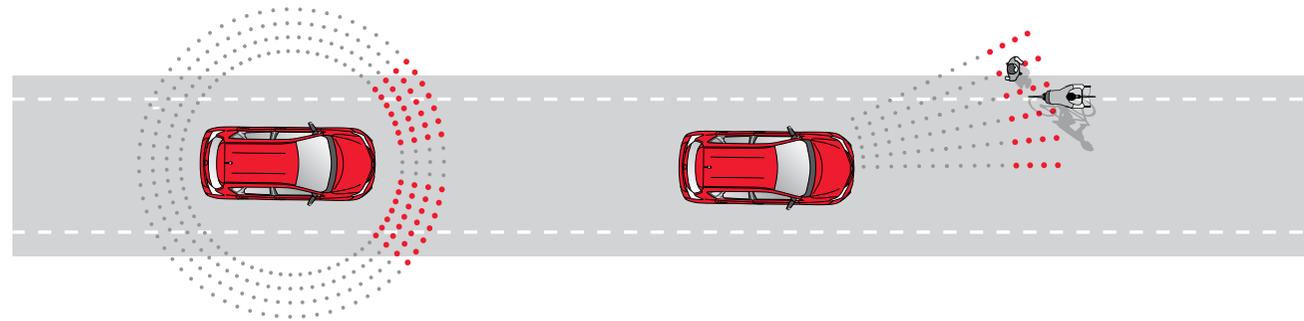

Plus, you'll have the added benefits of the latest Toyota Safety Sense (TSS) technologies: Lane Trace Assist, Pre-Collision Safety System with pedestrian and daylight cyclist detection, Road Sign Assist, Intersection Turn Assist, Lane Departure Alert and Automatic High Beam.<sup>9</sup>

# Toyota Safety Sense

At Toyota, we believe it's simply not enough to say "safety comes first" – we prove it. That's why, in our ongoing pursuit of creating ever safer cars, now and into the future, we developed Toyota Safety Sense<sup>9</sup> (TSS). A suite of active safety features designed to help support safe driving and help protect you and your passengers.

Yaris features the latest TSS driver assistance technologies, aiming to recognise and help avoid certain hazards and collisions, giving you and your passengers greater peace of mind wherever you're headed. Yaris TSS features differ by grade, please visit [toyota.com.au](http://toyota.com.au) for vehicle and specification information.

## Lane Trace Assist

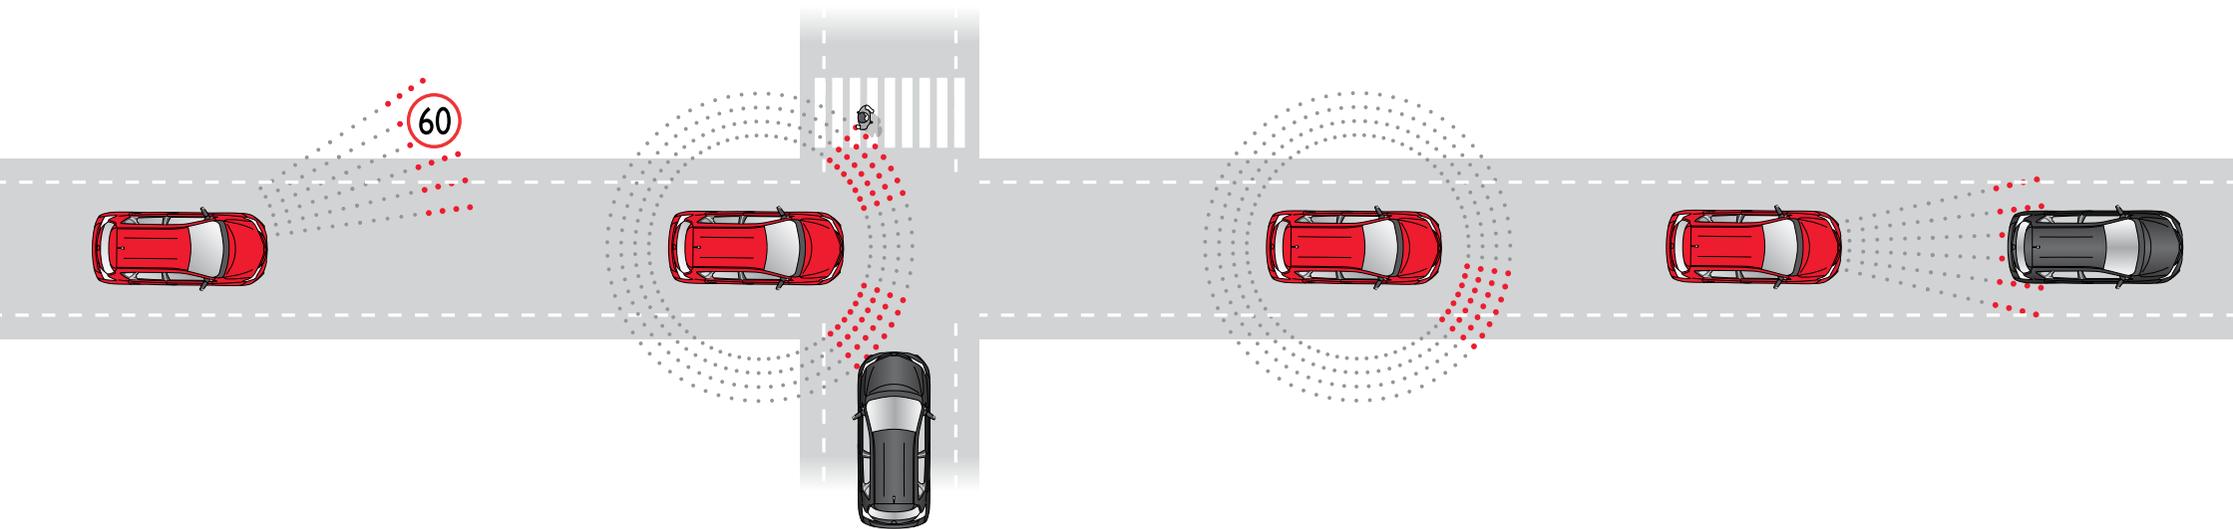

When driving on highways and freeways, Lane Trace Assist uses a camera to detect lane markings when cruise control is active. It is designed to alert you and provide steering assistance to help avoid drifting, and keep you centred in your lane.<sup>9</sup>

## Pre-Collision Safety (PCS) system with pedestrian and daylight cyclist detection

Pre-Collision Safety (PCS) system with pedestrian and daylight cyclist detection is a multi-stage warning system. Using an integrated camera and radar to help detect other vehicles in front of you, the PCS is designed to assist the driver where there is a likelihood of frontal collision with cars and pedestrians during day or night, or cyclists during the daytime. PCS includes a visible and audible alert of possible collisions, additional braking force to assist when you're braking, and if a collision appears to be unavoidable automatic braking to help mitigate impact.<sup>9</sup>

Safety  
Sense

## Road Sign Assist

Road Sign Assist was developed to help recognise certain road speed signs and provide information to you. It displays the most recently recognised speed limit on the Multi Information Display.<sup>9</sup>

## Intersection Turn Assist

Intersection Turn Assist helps prevent accidents at intersections by detecting oncoming cars and pedestrians crossing the street when the vehicle is turning.<sup>9</sup>

## Lane Departure Alert with steering assist

Lane Departure Alert with steering assist is designed to help prevent vehicles drifting from their lane by monitoring road markings, and providing a visible and audible alert should it detect any deviation from the lane. It may also apply additional steering force if needed to help you stay in your lane.<sup>9</sup>

## Active Cruise Control

Active Cruise Control is designed to help keep a constant distance between vehicles. It uses a milliwave radar to monitor the gap between your vehicle and the one in front, automatically accelerating or slowing down when needed to help you maintain a set distance.<sup>9</sup>
