

ChargeHub

CHARGING SOLUTION

ZERO EMISSIONS. SILENT MOTORING. NO MORE PETROL STATIONS.

A NEW ERA OF
DRIVING IS HERE.

And MG Motor is at the forefront of the accessible electric revolution.

From the award-winning ZS EV – to the quiet and clever HS Plus EV range, MG's electric journey has already begun.

But MG isn't just about the EV.

The MG ChargeHub is at the heart of the paradigm shift to EV hotspot charging that will help to bring **electric motoring to everyone.**

TETHERED 5 METRE TYPE 2 CABLE COMES AS STANDARD

MG ChargeHub: FOR EVERY HOME AND BUSINESS

Available in two capacities, the MG ChargeHub offers Type 2 charging capability for any suitable electric vehicle on the market in Australia.

Its low-profile form factor is designed not only to be compact and low-impact, its stylish, elegant look complements even the most modern Australian garage or building façade.

Its distinct RGB LED surrounds the discreet Type-2 plug cradle, while the ChargeHub's integrated five-metre-long cable and Type-2 plug ensures maximum charging flexibility

MG ChargeHub: ALWAYS CONNECTED

The MG ChargeHub comes fully connected and ready to perform when you need it, with connectivity via 4G, Ethernet or wi-fi.

If you're using the ChargeHub for your business, connected RFID cards also guarantee security for multiple users. Simply tap and go; it's that easy with the MG ChargeHub.

MG ChargeHub: SEAMLESS FLEXIBLE CHARGING

The MG ChargeHub's Open Charge Point Protocol (OCPP) guarantees a seamless charging experience, load balancing options and monetised charging for all users, now and later.

What's more, the weather-resistant ChargeHub can be installed inside or outside under suitable cover for maximum flexibility.

MG ChargeHub: EVERYWHERE, ANYTIME

MG ChargeHubs are starting to be installed at hospitality venues around the country, as MG Motor moves forward with its infrastructure roll-out support program focused on hotels and accommodation providers.

No matter which EV you own, the ChargeHub offers style, convenience and charging speed in the palm of your hand. It's the perfect complement to a new age of low-impact motoring.

MG ChargeHub: FASTER CHARGING

The mathematics are simple – more kilowatts equals faster charging. Adding a ChargeHub is a smarter, safer and more secure way to regulate the way EV recharges occur at your venue... and once the ChargeHub is installed, it won't cost you any more to use it than plugging your car directly into the wall.

Think of the ChargeHub as a watering can with a wider spout; it gets the job done faster, but it uses the same amount of water.

FOR ALL EVS

The ChargeHub is compatible with all Type-2 portequipped EVs, meaning that it is not only perfectly suited to the full range of MG Electric Vehicles, but most EVs on the market. This means that once you install the MG ChargeHub, your customer charging needs will be satisfied for years to come.

CHARGE TIMES

The ChargeHub 7 can reduce charging times on a typical EV battery from zero to 80% by two-thirds, while the ChargeHub 11 – suited for locations with access to a three-phase electrical circuit – is faster again.*1

MG ChargeHub: STYLE AND SUBSTANCE

Even though the ChargeHub is a state of the art charging device, it doesn't forgo beauty. Its stylised form complements both modern and classic architecture, while its small form factor allows it to be mounted in the most convenient space.

The ChargeHub is an integral part of the electrified future for MG. The MG ChargeHub is available now from MG Motor dealers in 7kW single-phase and 11kW three-phase configurations. The 7kW ChargeHub can recharge a typical EV battery in a quarter of the time it takes with the typical emergency cable supplied with your car*. While the 11kW unit is suitable for three-phase power-equipped homes and businesses.

ELECTRIC FOR EVERYONE

From the value-driven ZS EV to the forthcoming Cyberster, MG's commitment to the EV space is unparalleled – and this commitment extends to charging.

The MG ChargeHub is, and always will be, able to recharge any suitably equipped electric vehicle in the Australian market that's equipped with a Type-2 plug.

This brand-agnostic approach shows that MG is all about Electric For Everyone.

*1 When compared to 2.4kW emergency charging cable supply with MG ZE EV. Charge speeds from 80 to 100% are slowed to prolong battery life

INSTALLATION

Our commitment to the ChargeHub extends past the showroom. MG's own electrical consultancy team is available to discuss any issues or queries you may have about the installation and operation of our ChargeHub.

MG ChargeHub: SAFETY FIRST

The MG ChargeHub is certified to the most stringent Australian standards for complete peace of mind. Sophisticated anti-tamper electronics and a prominent shut-down button, offer further security and safety for all users.
